NETWORKING AT WAMCon VIRTUAL NASHVILLE

April 24, 2021

Hello WAMCon guests and attendees! Below are a brief set of instructions for navigating through the networking padlet: **wam.rocks/network**

On this open forum, you can add questions, links to resources, and connections to Nashville and beyond. We ask that everyone please remain respectful towards one another in order to keep this a safe space for everyone. The instructions are as follows:

- To add a post, click on the plus signs at the bottom of one of the four columns, or click the plus sign at the bottom right.
- When adding a post, there are options to upload pictures, links, and various other media. To expand on these options, while posting, click the three dots to reveal a more detailed list of media options to post.
- To add a comment to an existing post, type in the comment section below each post. Feel free to add your name.
- The heart at the bottom left column of each post allows you to like specific posts.
- To copy or expand a post, click the three dots in the upper right column of the post.
- To edit or delete a comment, click the three dots to the right of the comment, and click edit or delete. After a comment is deleted, the action cannot be undone.

Happy networking!!
